MACHINE FACTORY EXPANDS;
NEW MINES BEGIN PRODUCTION

FACTORY TO GET NEW SHOP -- Belgrade, Rad, 6 Nov 50

The "14 Oktobar" Construction and Mining Machinery Factory in Krusevac, which recently began the production of the first Yugoslav-made shakers for mines, will acquire an additional large shop at the beginning of the Second Five-Year Plan. In addition to the new shop, which will be 116 meters long and 102 meters wide, ten other departments and auxiliary shops will be built at that time. One section of the new shop is expected to be in operation this year.

In addition to the above shop, another shop which will produce various welded pipes and boiler flues will be erected. Two foundries will produce cast iron and cast steel products, and a carpenter shop will produce molds for the foundries. A thermal power plant also will be built for the factory.

In addition to 4.5 kilometers of track, the factory will have over 3 kilometers of roads.

JANJEVO MINE IN OPERATION -- Belgrade, Glas, 8 Nov 50

Pristina, 7 November -- The mine at Janjevo near Kosovo is the first lead and zinc mine in the Ajvalija basin to begin production. Within a few months the mines at Novo Brdo and Ajvalija will begin production. All three mines together will produce one tenth of the amount of lead and zinc produced by the lead and zinc mine at Trepcia. The new mines are served by 30 kilometers of roads and industrial railroads. Their ore will be smelted in the smelter of the mine at Trepcia.

Two cableways which will connect the Novo Brdo and Ajvalija mines with the new Janjevo-Gracanica standard-gauge line are planned.
